Sablefish Fishery Management Regions

NOAA
FISHERIES

Sablefish fishery history

- **1960s-1970s**
 - Foreign unregulated
 - High catches
- **1970s - 1980s**
 - 1976 Magnuson-Stevens Conservation Act
 - Foreign, Joint Venture, Domestic
- **1980s - 1990s**
 - Derby style open access fixed gear fishery
 - Domestic trawl allocations
 - High population
- **1995 - current**
 - Individual Fishing Quota Program (IFQ)

NOAA
FISHERIES

Sablefish fishery history

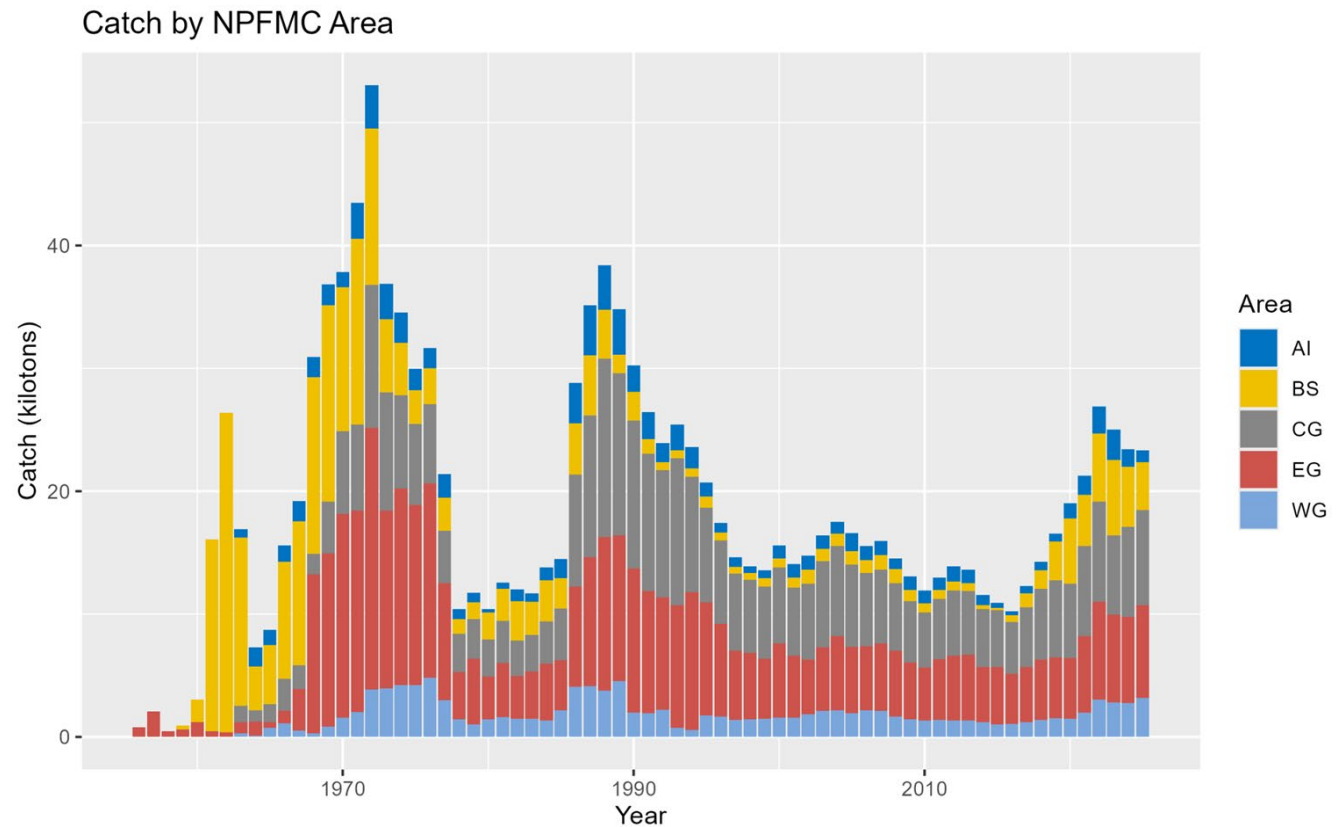

- **1995**
 - Individual Fishing Quota Program (IFQ)
 - Fixed gear (pot/hook) only for IFQ
 - Alaska-wide management
 - apportioned across mgmt regions
 - Trawl/IFQ allocations fixed by Mgmt areas
- **2016**
 - Pot gear legalized in GOA in 2016
 - response to whale depredation

FISHERIES

Sablefish fishery data

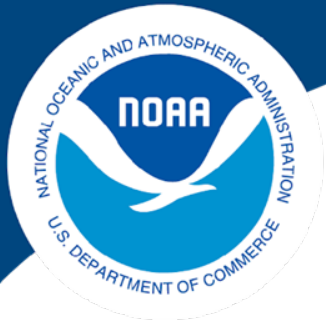

- **1972**
 - Foreign fleet observer program
- **1986**
 - Domestic fishery observer program
- **1990**
 - Formal groundfish plan for comprehensive fishery dependent data observer program
- **2013**
 - Restructuring plan - expanded to vessels <60ft
- **2018**
 - Integration of Electronic Monitoring

NOAA
FISHERIES

Sablefish Observer Coverage

- **Full coverage**
 - Catcher/processor, mothership, transferable catch share programs
 - Few sablefish vessels
- **Partial coverage**
 - Trawl catcher and fixed gear >40ft
 - Random selection of trips
- **EM coverage**
 - Vessels choose to opt in EM pool
 - Fixed gear vessels are subject to a selection rate (16.77% in GOA)
- **Zero coverage**
 - Vessels < 40ft

NOAA
FISHERIES

Sablefish Observer Coverage

- **Partial coverage rates**
 - Determined by unified regional strata
 - BSAI and GOA
- **GOA 16% selection rate**
 - Overall good coverage
 - Many trips, many vessels, easy to have observers in ports, consistent sampling
- **BSAI 39% selection rate**
 - Overall poorer coverage
 - Fewer trips, fewer vessels, logistically challenging,
